Job Title: Midstream Natural Gas Market Analyst

Phillips 66 & YOU- Together we can fuel the future

Description

The Midstream Natural Gas Market Analyst position is an excellent development role to gain Midstream experience with frequent interactions with the value chain growth drivers for the PSX Midstream business. This position will be responsible for developing the long term view of natural gas markets. This will include analyzing fundamental supply and demand data, drilling and rig count data, monthly production, export shipping, product prices (basis/premiums), regional spreads, forward curves, seasonality analysis, and macroeconomic variables. The position will also partner with the NGL and Petrochemical analysts to develop and integrated value chain from wellhead to end user.

Responsibilities may include:

- Developing, implementing and maintaining tools and processes to gather, interpret, and model information for use in strategic planning, fundamental forecast activities, and market trend analysis.
- Analyzing natural gas industry data value chain to develop forecasts, identify key takeaways of the analysis, and communicate the findings and conclusions clearly and concisely verbally and in written memos and PowerPoint reports.
- Conducting research on related topics in order to increase business’ understanding of the factors that influence supply and demand dynamics in global markets.
- Creating quarterly fundamental snapshot reports for respective regional markets or commodity products to the greater team and management.
- Identifying market gaps, business opportunities based on fundamental analysis.
- Interacting with energy market consulting companies to obtain up-to-date information and analysis and guiding the direction of their research and service offerings.
- Developing and enhancing forecasting models for chemical product demand, supply, capacity, trade, costs, margins, and prices using a consistent, organized and accurate approach.
- Providing ad hoc analysis and compile data as needed by the business.
- Providing ad hoc analysis and market data for corporate senior management and Midstream business unit management.
- Providing input to annual corporate long range price forecasts.
- Performing various sensitivity and scenario analyses.
- Performing high level analytic or pricing modeling. May develop quantitative/analytic models.

Qualifications

Basic/Required:

- Legally authorized to work in the job posting country
- Bachelor’s Degree in Agricultural Economics, Economics, Engineering, Finance or Statistics
- High degree of ethics, personal drive and dedication to achieve team goals and objectives
- 3 or more years of financial, economic, statistical analysis or modeling experience
- 1 or more year(s) exposure to and/or experience in the natural gas value chain
- Proficiency in MS Office including Access

Preferred:

- 3 or more years’ experience in the natural gas markets with direct exposure to natural gas processing plants to include fundamental supply and demand analysis
- Experience in the fertilizer markets given their downstream exposure to natural gas
- Proficiency in Access or other database management software
- Experience in statistical modeling
- Advanced Excel modeling skills
- Strong analytical and problem solving skills to support business focused analyses and decisions
